Mining Engineering and Consulting Services

At Daira Sabz Consulting and Engineering Group, we provide comprehensive Mining Engineering and Consulting Services that support sustainable, safe, and efficient mining operations. With active registration and operations in Germany and Afghanistan, our work is guided by global standards like ISO 9001:2015, ISO 14001:2015, UN SDGs, and EU Mining Waste Directive 2006/21/EC, while remaining compliant with local mining laws and environmental policies in every country we operate.

Integrated Services Across the Mining Lifecycle

We deliver expert solutions from exploration to mine closure, using digital technologies, environmental safeguards, and social responsibility to deliver cost-effective and regulation-compliant outcomes.

Our Core Mining Services

Geological Exploration & Resource Modeling

- GIS and remote sensing tools
- 3D geological modeling
- Core sampling and borehole analysis
- Mineral reserve evaluation

Feasibility Studies & Project Management

- Technical and financial feasibility studies
- Risk assessments and stakeholder engagement
- Procurement and contract administration
- Local permit acquisition and compliance tracking

Environmental and Social Impact Assessments (ESIA & IEE)

- Baseline studies (air, noise, biodiversity, water, socio-economics)
- ESIA, Initial Environmental Examinations (IEE)
- Stakeholder consultations and public disclosure
- Mitigation planning and environmental monitoring systems
